Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Concrete in Highway Construction: A Text-Book for Highway Engineers and Supervisors The development of manufacture and of agriculture, which require proper transportation facilities not only on the railroads but to the points of shipment and distribution, has stimulated a widespread interest and called national attention to the necessity for better pavements and for highway constructions of a more permanent and durable character. This demand, as well as the necessity for reducing the expense of repairs incident to automobile traffic, has brought to the forefront the use of concrete to produce permanent construction, not only for sidewalks and pavements, but for highway structures, such as bridges, retaining walls, culverts, and the many smaller details, the repairs to which are continually vexing the City and Town Engineer and the Highway Commissioner. The purpose of the present volume, then, is to present to those in charge of street and highway construction and maintenance, examples of work which have been satisfactorily performed, and, further, to give drawings and designs made especially for The atlas Portland Cement Company, either as reproductions of existing structures, from drawings and photographs kindly furnished by the local authorities, or as original designs prepared by expert engineers at the request of the atlas Portland Cement Company. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
