CARDIOVASCULAR DISEASE IN THE ELDERLY (PAPERBACK)

[DOWNLOAD](#)

Oxford University Press, United Kingdom, 2011. Paperback. Condition: New. Language: English . Brand New Book. The population is ageing, and most cardiovascular diseases are more common in older people. Older people often present atypically, have multiple co-morbidities, and are vulnerable to therapeutic delays or errors. The healthcare needs of the elderly differ from those of younger patients and are more complex, related to the physical and psychological changes associated with ageing and other disease processes in the elderly population. In addition, the response to treatment may alter with ageing, yet many elderly patients with cardiovascular disease are not looked after by specialists. Cardiovascular Disease in the Elderly provides user-friendly advice in a field that has limited evidence but contributes significantly to the workload not only of cardiologists but also of elderly care physicians and general practitioners. It reflects current UK and international guidelines and provides key evidence based references. Wherever possible, published guidelines are incorporated to ensure the book reflects current recommended management. It indicates where practice differs from that of younger adults, and provides guidance on the ethical and clinical dilemmas particular to the elderly. The handbook covers many aspects of cardiovascular disease in the elderly and focuses on common problems, including heart failure, atrial fibrillation and isolated systolic hypertension.
