

Genes for Africa: Genetically Modified Crops in the Developing World (Paperback)

By Jennifer A. Thomson

University of Cape Town Press, South Africa, 2004. Paperback. Condition: New. Language: English . Brand New Book. In Genes for Africa, Jennifer Thomson separates fact from fiction and explains why and how GM crops can help us combat poverty, starvation and disease in the developing world, in a safe and responsible way. She explains the technology, addresses controversial issues such as food safety, patents, labelling, regulation and controls and ends with a focus on Africa and possible future developments in GM technology.

Reviews

Basically no phrases to clarify. It really is rally fascinating through reading time. Once you begin to read the book, it is extremely difficult to leave it before concluding.
