Springer. Paperback. Condition: New. 292 pages. Dimensions: 9.2in. x 6.1in. x 0.8in. A volume of this nature containing a collection of papers has been brought out to honour a gentleman - a friend and a colleague - whose work has, to a large extent, advanced and popularized the use of stochastic point processes. Professor Srinivasan celebrated his sixtieth birthday on December 16, 1990 and will be retiring as Professor of Applied Mathematics from the Indian Institute of Technology, Madras on June 30, 1991. In view of his outstanding contributions to the theory and applications of stochastic processes over a time span of thirty years, it seemed appropriate not to let his birthday and retirement pass unnoticed. A symposium in his honour and the publication of the proceedings appeared to us to be the most natural and suitable to mark the occasion. The Indian Society for Probability and Statistics volunteered to organize the symposium as part of their XII Annual conference in Bombay. We requested a number of long-time friends, colleagues and former students of Professor Srinivasan to contribute a paper preferably in the area of stochastic processes and their applications. The positive response and the enthusiastic cooperation of these distinguished scientists have resulted in the present collection. The contributions to this volume are divided into four parts: Stochastic Theory (2 articles), Physics (6 articles), Biology (4 articles) and Operations Research (12 articles). In addition the keynote address delivered by Professor Srinivasan in the symposium is also included. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
