In recent years, the paranormal has gained new footing as reality television has grabbed onto this research and created a cultural frenzy around it. There are those who are skeptics, those who believe, and those who seek to prove the existence of the paranormal. In *The Double-Blind Ghost Box*, authors Shawn Taylor and Daniel Morgan share their research and personal experiences with the paranormal, focusing on the development and use of the ghost box, a device that can establish a two-way communication beyond death's veil. *The Double-Blind Ghost Box* reviews the process of Taylor and Morgan's studies of the device, along with how they determined its usefulness in researching the paranormal. They explore the history of the ghost box and the issues arising in today's ghost box methods, and they offer methods for conducting an objective ghost box investigation, processing ghost box evidence, analyzing the findings, and presenting the results to clients. Taylor and Morgan also discuss the different spirits an investigation might uncover and future ghost box applications and technologies. Sharing actual transcripts of investigations, *The Double-Blind Ghost Box* works toward communicating the existence of the paranormal through objective research. Shawn Taylor has a technical background in computer hardware, software, programming, digital media, Six Sigma problem solving, statistical analysis, psychology, and counseling. Daniel Morgan earned degrees in behavioral science and electrical engineering.
