Torrance Monroe couldn't be happier. She has landed her dream job as a botanical scientist for the Parks and Wildlife Service in Wilmington, North Carolina. Her specialty will be the conservation, study, and propagation of the native plants that have fascinated her since her earliest memories: the Venus Fly Trap. Dominique Black isn't happy. As a Wildlife Officer, he has been working at the grass roots level to save the endangered traps from poachers looking to make a quick buck. It is grueling work, with the majority of offenders going unpunished. How could a scientist with zero experience in the field help him when even the law was failing? The two are at immediate odds even though they share the same underlying passion for the plants and each other. However, after a well-known poacher harvests traps from one of the local swamplands, Tori and Dom must set aside their differences in order to catch the criminal and keep the remaining plants from being harmed. In the process, Tori learns to rely on the mysterious Venus Fly Trap folk lore she remembers from her childhood. Dom learns to release control and have faith in another person. The Venus Cure is a fast-paced, erotic, and lightly mystical, romantic suspense novella that centers around the serious issue of Venus Fly Trap poaching. The author chose the title based on five possible meanings. See how many you are able to discover!.
