

## Matrix: Algebra, Calculus and Generalised Inverse, 2 Parts

By A.K. Hazra

Viva Books Private Limited, 2009. Hardcover. Book Condition: New. First edition. The book is intended for undergraduate and graduate students of Mathematics, Engineering, Social Sciences in general. Professionals and researchers of those fields may also use it as a reference and find the book useful. It is one of the principal branches of Mathematics. The contents are arranged in such a way that a beginner can easily grasp the material step by step. The theories are made lucid through illustrated examples. No prerequisite is necessary for sequential study of the materials, except some preliminary knowledge of calculus for the Calculus part of the book. The 'Generalized Inverse' is essential for undergraduate and graduate study in Statistics, Numerical Analysis, Engineering, Physics and other Social Sciences of most of the institutions of the world. Key Features : Most attractive feature of the book is the GRE sample tests. Most chapters include some definitions and ideas different from classical texts. Dozens of algorithms can be converted to computer programs. Formulation of the modal matrix in case of multiple eigenvalues in terms of grandparent, parent and daughter is perhaps a new and pleasant terminology. Most texts ignore the inverse of singular as well as...
