

Report on the Work of the Committee Appointed by the Sanitary Institute of Great Britain to Practically Test Ventilating Exhaust Cowls

By Napier Shaw

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 46 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1901 Excerpt: . . . along open vertical pipes. In the course of these experiments when, Miniature Bobinson Anemometer, 1-in. Cups, 1-in. Arms. Experiments by Mr. W. H. Dines, at Oxshott, 1896-7, and Hershams, 1889. in addition to the anemometer, a Dines Pressure Tube had been installed at the Hut, simultaneous readings were obtained from the pressure tube, the Kew Pattern Anemometer, the 1-inch cup instrument, and at the same time the flow of air up two of the tubes, which may be called the upcast, was also determined. During these experiments the Dines pressure tube occupied the position of the central pipe referred to later on, but the upcast for that pipe could be inferred from the flow of the two outer pipes in a manner which will be explained in the next section of this report. It is introduced here only as a basis for the comparison of the...
