# Sensor Fusion for Nanopositioning

Filesize: 4.38 MB

Reviews

Complete information for publication fanatics. It is actually rally intriguing throgh reading period of time. I am happy to explain how this is actually the greatest publication i actually have read inside my own daily life and may be he finest ebook for possibly.
(Ms. Heidi Rath)

SENSOR FUSION FOR NANOPOSITIONING

To download **Sensor Fusion for Nanopositioning** PDF, remember to refer to the link beneath and download the ebook or gain access to other information that are in conjuction with SENSOR FUSION FOR NANOPOSITIONING ebook.

GRIN Publishing Jan 2015, 2015. Taschenbuch. Condition: Neu. Neuware - Master's Thesis from the year 2014 in the subject Electrotechnology, grade: 2, Vienna University of Technology (Institute for Automation & Control), course: Master in Automation - Electrical Enginnering, language: English, abstract: Sensors can be used to measure the position of an object. In the present thesis the effects which limit the usage of sensors in high dynamic positioning applications on a nanometer level are discussed. Various sensor principles and their properties are investigated and compared. Sensors based on the measurement of i.a. magnetic fields, illumination, or even strain are characterized, as well as their range, bandwidth, resolution, linearity and disturbance rejection is determined.It will be shown that the simultaneous use of multiple sensors and the specific combination of sensors' data (fusion) enables a higher performance primarily in terms of resolution and dynamics. Several techniques for the fusion are discussed under consideration of various aspects, however the ultimate aim of sensor fusion is similar. The methods of feedforward control, complementary filtering, Kalman filtering and optimal filtering (robust control) are developed and verified on practical problems in position sensor systems. To treat various challenges in sensor filtering and sensor fusion a methodological approach, containing separable steps of - problem formulation with well-defined prerequisits and simplifications, - theory discussion with approach to find a solution, - analytical proof or reasoning by statistical values out of numerical simulations, - experiment design, and - verification on a real time platform are realized. 148 pp. Englisch.
