paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 108 Publisher: Fudan University Press Pub. Date :2007-09. As human genetics and molecular biology disciplines, such as the rapid development of medical cell biology and medical genetics as the forefront of life science disciplines, and its increasingly prominent role and status, which two curriculum is also an important professional medical schools basic course, the experimental techniques necessary to master the basic skills of medical students. Given the current courses offered by the institutions are not identical, and some were set up Medical Cell Biology and Medical Genetics; others set up medical biology, cell biology and medicine, but medical genetics is still its main content. At the same time, taking into account the differences in teaching hours, based on years of teaching practice we prepared this experimental teaching materials. The book includes medical cell biology experiments and medical genetics experiment in two parts, each adapted to medical biology, cell biology and medical genetics experiment teaching. Choice of content in the experiment, more attention to the actual conditions of local colleges and universities, has broad applicability and operability for medical colleges clinical medicine, medical tests, pharmaceutical, biotechnology and other professional students. This book consists of three parts. The first part of medical cell biology experiments, 14 experiments were arranged, including the structure and use of the microscope, the basic form and structure of cells, cell physiological activity, cytoskeleton, cell division, cell culture. The second part is the medical genetics experiments were arranged in nine experiments, including a survey of normal human genetic traits, human chromosome specimen preparation, observation of human chromosome G-banding and karyotype analysis, sex chromatin examination. Four Satisfaction guaranteed, or money back.
