Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Antenna Design Strategy With Higher-Order Surface Integral Equation Formulation and Inverse Equivalent Current Method | Modern radio, wireless, and satellite communication and radar systems often require accurate and efficient modeling, analysis, and/or synthesis of electrically large, uniquely designed beam pattern antennas operating in the presence of geometrically complex environments. The electromagnetic analysis and synthesis of such electrically large and complex structures pose a challenging problem in terms of computer resources. The efficient...
