Attention should here be called again to the fact that the carbon black merely absorbs the harmful materials and does not, therefore, permanently remove ISOLATION AND IDENTIFICATION OF HARMFUL COMPOUNDS. 31 them from the soil, if the carbon black is directly added to the soil and allowed to become a part of it. In some cases a leaching of the soil with water has brought about a marked increase in the productivity of the soil although by such leaching mineral plant nutrients were removed along with the substances hindering growth. In the above experiments the object was to demonstrate the presence of harmful bodies in the soil and soil fluid,...
