The HyperText Transfer Protocol, or is the backbone of the World Wide Web. is the language that each Web browser (or other Web client) uses to communicate with servers around the world. All Web programmers, administrators, and application developers need to be familiar with in order to work effectively. This text not only offers a solid conceptual foundation of it also serves as a quick reference to each of the headers and status codes that comprise an transaction. The book starts with a tutorial of but then explains the client request and server responses in more detail, and gives a thorough technical explanation of more advanced features of (such as persistent connections and caching).
