

Adaptive Feed-Forward Control of Low Frequency Interior Noise (Hardback)

By Thomas Kletschkowski

Springer, Netherlands, 2011. Hardback. Condition: New. 2012. Language: English . Brand New Book. This book presents a mechatronic approach to Active Noise Control (ANC). It describes the required elements of system theory, engineering acoustics, electroacoustics and adaptive signal processing in a comprehensive, consistent and systematic manner using a unified notation. Furthermore, it includes a design methodology for ANC-systems, explains its application and describes tools to be used for ANC-system design. From the research point of view, the book presents new approaches to sound source localization in weakly damped interiors. One is based on the inverse finite element method, the other is based on a sound intensity probe with an active free field. Furthermore, a prototype of an ANC-system able to reach the physical limits of local (feed-forward) ANC is described. This is one example for applied research in ANC-system design. Other examples are given for (i) local ANC in a semi-enclosed subspace of an aircraft cargo hold and (ii) for the combination of audio entertainment with ANC.

Reviews

It is one of the most popular publications. It really is filled with knowledge and wisdom. It has been designed in an exceedingly straightforward way and it is merely soon after I finished reading this pdf by which it actually transformed me, affected the way in my opinion.

-- Gerardo Rath

It is a remarkable ebook which I have possibly read. It really is packed with wisdom and knowledge. It has been printed in an extremely easy way which is only after I finished reading through this pdf by which it really altered me, altered the way I believe.

-- Dr. Nikolas Mayer
