Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Treatments for the Protection of Stored Southern-Grown Corn From Rice Weevil Attack: Exploratory Tests Exploratory studies were made at Tifton, Ga. Between 1951 and 1958, on the use of lindane, malathion, methoxychlor, synergized pyrethrum, and ryania as insecticides to protect stored corn against rice weevil infestation. Results were to be used as a basis for evaluation studies on a commercial scale. Samples of treated ear corn in the husks, husked ear corn, and shelled corn were exposed for varying lengths of storage in 1-gal lon jars and 5-cubic - foot drum-type bins. Protection was measured by the increase of infested ears and the increase in weevil-damaged kernels, compared to increases in untreated checks, during the selected storage periods. Lindane protective dusts and sprays - applied at dosages of 2 to 5 parts per million of lindane were highly effective in protecting husked ear corn and shelled corn for periods up to 18 months. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
