## GLOBAL WARMING LOOKING BEYOND KYOTO (HARDBACK)

Pentagon Press, India, 2009. Hardback. Condition: New. Language: N/A. Brand New Book. The latest report from the Intergovernmental Panel on Climate Change (IPCC) reflects the growing international consensus that the earth's climate is being changed by anthropogenic greenhouse gases. Evidence presented by the IPCC and others points to the potential for increasingly dangerous weather, new disease outbreaks, regional water shortages, the loss of habitat and species, and other disturbing developments that could have profound social and economic impacts. Opinions on what should be done, however, remain sharply divided within and among countries. Though monumental in its efforts, the Kyoto Protocol has left much to be agreed upon and achieved, with the world's largest emitter of carbon dioxide --the United States --rejecting it. In *Global Warming: Looking Beyond Kyoto*, some of the best-known and respected authorities in climate policy provide a comprehensive agenda for global collective action. Representing both industrialized and developing nations, the contributors present a thought-provoking examination of the economic, social, and political context of climate policy within their countries. With Kyoto's emissions targets set to expire in 2012, these authors call for a multilateral approach that goes beyond the mitigation-focused Kyoto policies, balancing them with strategies for adaptation. They also stress the importance of generating policies that work within a time frame commensurate with that of climate change itself. Informed, insightful, and even-handed, this book gives a new impetus to the increasingly important global climate policy debate. Contributors include R.K. Pachauri (Energy Resources Institute and the IPCC), Richard S. Lindzen (Massachusetts Institute of Technology), Stefan Rahmstorf (Potsdam Institute for Climate Impact Research), Stephen H. Schneider and Thomas Heller (Stanford University), Robert Mendelsohn and William D. Nordhaus (Yale University), Gernot Klepper and Sonja Peterson (Kiel Institute for World Economics), Robert N. Stavins (Harvard University), Alexander...
