ELEMENTS OF NEWTONIAN MECHANICS

To download **Elements of Newtonian Mechanics** eBook, make sure you refer to the web link under and save the file or get access to additional information that are in conjunction with ELEMENTS OF NEWTONIAN MECHANICS ebook.

Condition: New. Publisher/Verlag: Springer, Berlin | Including Nonlinear Dynamics. With 131 Problems with Solutions and 89 Worked Examples | This textbook provides a thorough introduction to Newtonian Mechanics and is intended for university students in physics, astronomy and engineering. It is based on a course for which the author earned an award as the best introductory course at the University of Copenhagen, Denmark. About 130 problems with solutions and 89 worked examples help the students to grasp the essential aspects of the subject, and to develop proficiency in using the powerful methods of Newtonian Mechanics. Moreover, the problem of motion and the concept of inertial frames is faced from the very beginning, and runs through the entire development of classical mechanics. This new and fresh approach will give the student the best introduction to an important area of physics. | In the third edition a number of minor misprints that appeared in the second edition have been corrected. Furthermore, 17 new problems have been added, at the end of chapters 6, 8, 9, 11, 12, 13, and 14. The answers to these 17 problems have not been listed in the 'Answers' section at the end of the book. This will permit the problems to be used as hand-in problems or perhaps in mid-term exams. JMK EUR9 PGH Copenhagen May 2000 Preface to the Second Edition In the second edition, a number of misprints that appeared in the first edition have been corrected. In addition to this, we have made improvements based on the experience gathered in the use of the first English edition of the book in the introductory course in physics at the University of Copenhagen. A chapter introducing nonlinear dynamics has been added. The purpose of this chapter is to provide supplementary reading for the students who are interested in...
