## INFLUENCE OF RAINFALL AND EVAPORATION ON SUCTION AND SLOPE STABILITY

Influence of rainfall and evaporation on suction and Slope Stability  
Effects of Rainfall Infiltration and Evaporation on Soil Suction and Slope Stability

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Effects of Rainfall Infiltration and Evaporation on Soil Suction and Slope Stability | Rainfall infiltration is one of the major factors that lead to slope instability in unsaturated soil. The infiltration leads to the decrease of suction and hence causes the reduction in shear strength of the soil. On the other hand, evaporation dries the soil mass which invariably increases suction resulting in increasing the shear strength of the soil and the...
