The key to overcoming this kind of self-defeating behavior is to change the way we think. Norman Vincent Peales great classic bestseller, The Power of Positive Thinking, was the first book to introduce positive thinking as a means to personal growth. Now, after years of extensive research and field-testing, working in cooperation with the Peale Center and major corporations nationwide, Scott Ventrella has adapted those concepts into a systematic program for people in business to achieve greater levels of personal and professional performance. The Power of Positive Thinking in Business provides a practical way for each of us to develop and actually strengthen the ten traits of a positive thinker. When we learn how to overcome negative internal barriers such as fear, lack of self-confidence, and low self-esteem, we develop the traits that characterize a positive thinker: Optimism Enthusiasm Belief Integrity Courage Confidence Determination Patience Calmness Focus This item ships from multiple locations.
