iConcept Press. Paperback. Condition: New. 192 pages. Dimensions: 10.0in. x 8.0in. x 0.5in. A neurological disorder is any disorder of the body's nervous system. Symptoms include, but do not limited to, paralysis, muscle weakness, poor coordination, loss of sensation, seizures, confusion, and altered levels of consciousness. Neurological Disorders - Clinical Methods brings scholars and experts who are working in the areas directly related to neurological disorder in front of you, and presents the latest research findings to you. Chapter 1 reviews Temporal Lobe Epilepsy (TLE). TLE is a well-described type of epilepsy but little is known about the epidemiology. The approach to patients with temporal lobe epilepsy is complex and requires a multidisciplinary team of trained specialists. Large-scale epidemiological studies are needed for improve the understanding of TLE is a therefore necessary. Chapter 2 presents the latest knowledge on the understand of the current sources in epileptic activity in mesial areas. Current sources is a very promising tool to refine radiosurgical and improve classical surgical methods for temporal lobe epilepsy. Chapter 3 highlights the atypical co-occurrence of two genetic disorders, Cornelia de Lange syndrome and Turner syndrome, in the same individual. It focuses on the clinical methods used to explain each clinical feature, with special emphasis on neurological findings. Chapter 4 concerns the use of of probiotics to prevent fungal infection against the decrease of morbidity and mortality in ELBW, especially about long lasting neurological sequelae. Chapter 5 describes an algorithm called Dynamic Autoregressive Neuromagnetic Causal Imaging (DANCI) which uses Granger causality to calculate effective connectivity from magnetoencephalography recordings. It also describes how this technique can be used to understand the fundamental reorganization of neural networks in neurodevelopmental disorders. Chapter 6 provides important and necessary information regarding brain herniation. Brain herniation represents a shift of brain parenchyma across the various anatomical...
