It will be interesting for outsourcing engineers to get clues about executive motivations of various management decisions. The authors hope that the book will make outsourcing more successful. After years of managing offshore development projects we found ourselves answering a stream of questions how to do certain things in outsourcing. As more new managers and engineers got involved in outsourcing and remote project management, they started looking for solutions to the similar issues we encountered before. Our colleagues and friends kept asking us again and again about outsourcing issues, so we decided to summarize our experience in a book focusing on intellectual property protection, remote human resource management and financial models of outsourcing activity. Everything in the book is based on our actual experience.
