MODELING AND ANALYSIS OF INFORMATION TECHNOLOGY SYSTEMS

Condition: New. Publisher/Verlag: GlobeEdit | Modern information technologies require innovations that are based on modeling, analyzing, designing and finally implementing new systems. Modern info-communication networks are one of the most complex systems where the reliability and efficiency of the components play a very important role. For the better understanding of the dynamic behavior of the involved processes one have to deal with constructions of mathematical models which describe the stochastic service of randomly arriving requests. The aim of the book is...
