

Energy, Cold Fusion, and Antigravity Znidarsic Science Books

By Frank Znidarsic PE

Paperback. Condition: New. 127 pages. Frank Znidarsic is a Professional Registered Electrical Engineer. He spent a life time working in energy related industries. He presents, from this background of experience, the technologies and problems with fossil fuels and conventional nuclear power. The environmental impact and the finite nature of these energy sources is reviewed in detail. Znidarsic has traveled to many laboratories to witness cold fusion and anti-gravitational experiments. He reveals what he saw and discovered during these visits. After many years of reviewing these results, a Newtonian description of the quantum condition was produced. This Newtonian framework was used to describe many known phenomena. The energy of a photon and the energy levels of the atoms were developed as effects of the approach. The techniques were then used to present the science of Low Level Nuclear Reactions and Anti-Gravity. The mathematics was confined to the final chapter of the book, however, the significance of the discoveries is clearly explained within a historical context. The text was written in such a manner that it will be interesting and educational for both the novice and the professional. This book replaces Elementary Antigravity II. A hard copy is also available at Amazon....
