ARMY TECHNIQUES PUBLICATION ATP 3-11.37 MCWP 3-37.4 NTPP 3-11.29 AFTTP 3-2.44 MULTI-SERVICE TACTICS, TECHNIQUES, AND PROCEDURES FOR CHEMICAL, BIOLOGICAL, RADIOLOGICAL, AND NUCLEAR RECONNAISSANCE AND SURVEILLANCE MARCH 2013

Createspace, United States, 2013. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.This manual revises and combines Multiservice Tactics, Techniques, and Procedures for Nuclear, Biological, and Chemical Reconnaissance and the now rescinded MTPP for Biological Surveillance manuals by incorporating shifting and emerging guidance, lessons learned, concepts and technologies to address doctrinal gaps identified in the CBRN Passive Defense Capabilities Based Assessment and from Service feedback. Accordingly, this publication is renamed: Multi-Service Tactics, Techniques, and Procedures for Chemical, Biological, Radiological, and Nuclear Reconnaissance and Surveillance. Its primary purpose is to provide a standardized reference for use by all Services while conducting CBRN RS operations. This publication contains several key modifications that were required to update and coalesce existing RS doctrine. It is ultimately designed to provide commanders with detailed, timely, and accurate CBRN intelligence to gain situational understanding of CBRN threats and hazards. Using a plan, prepare, and execute construct, this publication seeks to organize those activities necessary to ensure effective resource management and synchronize the efforts of staffs and leaders. In particular, execution activities are organized into a structural hierarchy that seeks to illustrate the elements of CBRN RS. These elements are forms, modes, methods, tasks, and techniques. CBRN reconnaissance operations are partitioned into three possible forms (route, zone, and area), as are CBRN surveillance operations (area, point, and medical). There are three modes common to CBRN reconnaissance and surveillance (mounted, dismounted, and aerial), while there are four methods (standoff, remote, direct, and indirect). There are five common CBRN RS tasks (detect, identify, quantify, collect samples, and report). CBRN reconnaissance-unique tasks (locate, survey, and mark) are supported by thirteen specific techniques, and CBRN surveillance-unique tasks (observe and monitor) have four embedded techniques. This structure is intended to provide a systematic...
