Verlag Dr. Kovac, Hamburg, 2006. Softcover. Book Condition: neu. 1. Auflage. Regensburger Studien zur Internationalen Politik, Band 1 174 pages. The proliferation of weapons of mass destruction (WMD), international terrorism, and their nexus are widely regarded as the gravest threats to peace and stability in the 21st century. To counter these threats, the Bush Administration formulated the National Security Strategy 2002, announcing that the U.S. "will, if necessary, act preemptively" to forestall the proliferation of WMD and their acquisition by terrorists. Its declaration and, subsequent, application against Iraq in 2003, caused much criticism and debate, which has raised a lot of questions regarding America`s policy of military preemption. Contrary to charges of being a radically new concept formulated by a trigger-happy, neoconservative administration, the author shows that the use of military force to prevent WMD-proliferation is not new to U.S. counterproliferation policy. What is new, however, is that NSS 2002 equates preemption with prevention. Indeed, since the Cold War ended, America acted militarily in a preventive way several times to counter the proliferation of WMD: Operations Desert Storm (1991), Desert Fox (1998) and Iraqi Freedom (2003) were, amongst other things, designed to reduce Iraq`s WMD capabilities. In 1994, the Clinton Administration seriously considered military strikes against North Korea`s nuclear program but in the end, dismissed the plans. At the same time, Washington did not prevent Pakistan and India from acquiring a nuclear weapons capability. Likewise, Libya was persuaded to give up its nuclear program not by bombs, but by diplomacy. Why were Saddam`s nukes bombed and the Kims` not - when all sought WMDs and sponsored terrorism? By comparing several cases, the book answers the following questions: Under what circumstances will the U.S. military target a nation`s WMD program? What factors condition the application of preventive military force to counter...
