Createspace, United States, 2012. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. The United States has no good options for resolving the North Korean and Iranian nuclear challenges. Incentives, pressures, and threats have not succeeded. A military strike would temporarily set back these programs, but at unacceptable human and diplomatic costs, and with a high risk of their reconstitution and acceleration. For some policymakers, therefore, the best option is to isolate these regimes until they collapse or pressures build to compel negotiations on U.S. terms. This option has the veneer of toughness sufficient to make it politically defensible in Washington. On closer scrutiny, however, it actually allows North Korea and Iran to continue their nuclear programs unrestrained. It also sacrifices more achievable short-term goals of improving transparency and securing vulnerable nuclear materials to the uncertain long-term goal of denuclearization. Yet these short-term goals are deemed critical to U.S. national security in the 2010 Nuclear Posture Review (NPR) and Quadrennial Defense Review (QDR). North Korea and Iran are very different states that share at least one crucial similarity: decades of estrangement from Washington and U.S. efforts to isolate them from the international community. They also play destabilizing roles in the regions they inhabit, lack respect for basic democratic freedoms, and maintain policies antagonistic to the United States, its friends, and its allies. It is hardly surprising that the Washington consensus still supports isolation. What is striking, however, is the pronounced international consensus in favor of engagement, which sharply constrains an already limited U.S. policy arsenal. Assessing two decades of nuclear diplomacy with North Korea and nearly a decade of efforts with Iran, it is clear that Washington needs a more promising strategy. Nothing short of a paradigm shift away from denuclearization is required to alter...
