

## Imitators of Epilepsy (Hardback)

By Peter W. Kaplan, Robert S. Fisher

Demos Medical Publishing, United States, 2005. Hardback. Condition: New. Second Edition. Language: English . Brand New Book. Many patients referred for an Epilepsy evaluation actually suffer from one of many conditions that can imitate it. Imitators of Epilepsy are a diverse group that involve consideration of many areas of internal medicine, neurology and psychiatry. The most important imitators of epileptic seizures are dizziness, Vertigo, Syncope, Complicated Migraine; and somewhat less frequently sleep disorders, Transient Cerebral Ischemia, Paroxysmal Movement Disorders, Endocrine or Metabolic Dysfunction, Delirium, psychiatric conditions or Transient Global Amnesia. Clearly under-recognised are hyperventilation episodes, panic attacks, and other psychogenic and psychiatric paroxysmal disorders that may simulate epileptic seizures. This volume provides a comprehensive review of the differential diagnosis of seizures: how do the imitators of Epilepsy present clinically, what are their particular distinguishing historical features and what tests are helpful with diagnosis? Expanding beyond the first edition, this second edition is divided into four sections. The first deals with an introduction and approach diagnosing spells, the electroencephalography of Epilepsy and its imitators and specialised tests of diagnosis such as measurement of serum prolactin. There are chapters on epileptic seizures that do not look like typical epileptic seizures, and conversely, apparent...
