Excerpt: . . . 6 Computer Technology in Medical Education and Assessment to providing better data for generation of standards, computer data bases could allow better comparison of present standards and norms of care with actual patient outcomes. These data bases also could permit the development of computer consultant systems. Feedback from medical information and health data systems could provide continuous updating of the data bases. Such data bases could be linked to education and assessment systems for improve-ments in both areas. Early in the medical education and assessment continuum, the em-phasis is on the accumulation, retention, and application of knowledge on which deci-sionmaking in future practice will be based. This general medical education is quite dif-ferent from the specialized training that follows undergraduate medical education. Fur-thermore, there is an inherent problem in deciding what aspects of...
