Springer-Verlag New York Inc., United States, 2013. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book. The volume which is here presented reports all the lectures given at the International Satellite Meeting on Biochemical and Pharmacological Implications of Ganglioside Function held at Cortona, Tuscany, Italy from 28 to 31 August, 1975. The Meeting was run just before the 5th International Congress of the International Society for Neurochemistry (Barcelona, 2-7 september, 1975) and was in fact organized on its frame. The general subject matter of gangliosides structure, biosynthesis and degradation, of their functional role in neurochemistry, their pharmacological action and future potentialities, was deeply and thoroughly taken into consideration during the three-day Symposium, which was brilliantly directed and guided by Dr. L. Svennerholm. The meeting gave certainly, in our opinion, a valuable stimulus to research workers interested in the biophysics, chemistry, biochemistry, physiology and pharmacology of gangliosides. The editors wish to express their thanks to the speakers, the discussants, the Meeting Chairman, the section chairmen and to all the attendants who have taken part at the Symposium and who actively and deeply discussed the delivered lectures. Our final thank is also for Dr. Francesco della Valle, official representative of FIDIA Research Laboratories, Abano Terme, Padua, Italy, to whom we are grateful for his continuous and efficient support. The contribution of the Secretarial Staffs of both the v PREFACE Department of Biochemistry of Perugia University and FIDIA Laboratories to the editorial work is also gratefully acknowledged. Softcover reprint of the original 1st ed. 1976.
