Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from New d104-Book of Geology: Designed for Schools and Academies In preparing this d104-book of Geology, the general plan of my Manual has been retained. The science is not made a dry account of rocks and their fossils, but a history of the earth s continents, seas, strata, mountains, climates, and living races; and this history is illustrated, so far as the case admits, by means of American facts, without, however, overlooking those of other continents, and especially of Great Britain and Europe. In this Fourth Edition, fifty pages have been added to the size of the work, in order to render the explanations, simpler and more complete, and to give also a fuller account of the kinds of life which contribute to rock-making, of the geographical distribution of marine species, and of the depths of the seas. Each of these topics is illustrated by new cuts, and the last by a general map showing the depth of the Atlantic and Pacific oceans by bathymetric lines, based mainly on that of Mr. H. N. Moseley, of the Challenger expedition. The map of the vicinity of Naples is from Murray s Handbook. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are...
