

The Astrophysical Journal, Vol. 39: An International Review of Spectroscopy and Astronomical Physics, January-June, 1914 (Classic Reprint) (Hardback)

By American Astronomical Society

FBC LTD, 2018. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Astrophysical Journal, Vol. 39: An International Review of Spectroscopy and Astronomical Physics, January-June, 1914 Many of Schumann s results are to be found summed up in the Smithsonian Contributions to Knowledge, No. 1413. His first considerable contribution to science was the investigation of the absorption of the air. The existence of the region which bears his name having been once established, he set himself to study the absorption of a number of gases and demonstrated that it was to oxygen that the high absorbing power of the air was due. He next proved that hydrogen possessed great transparency in the most refrangible region and made use of this fact to improve the action of his spectroscope by pushing the interior with this gas. On turning his attention to emission spectra, he obtained valuable information on the radiations from oxygen, carbon monoxide, carbon dioxide, and nitrogen; but it was in the study of the spectrum of hydrogen that his finest results were obtained. He showed that this gas possessed a multitude of lines extending from near A 1650 to...
