Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1910 Excerpt: .additional equations now required for the four constants are obtained from the condition that the moments and shears at the right end of section A B of Fig. 50 are equal to those at the left end of section B C. The values of these constants will now be determined. From eqs. (5) and (6) the moments and shears for the various sections are given by the following expressions: The conditions from which the independent equations are to be made up. are as follows: For  $x = 0$ ,  $M = 0$  in eq. (4)  $-v = \frac{1}{p}$ ,  $M = 0$  in eq. (B)  $x = k l$ , eq. (A) = eq. (B)  $x = \frac{1}{2} l$ , eq. (C) = eq. (D). Substituting these conditions in eqs. (A) to (D), the independent equations are found to be  $\frac{1}{8} p$  From these equations, the values of the various constants are given by  $-c - MY - l - C$ ,  $-C$ ,  $f - f_8$  (14) When eqs. (4), (5), and (6) are used to calculate deflection, moment, or shear, the proper values of  $C$ , and  $C_2$  are to be substituted as determined for the loading in question. Thus for the loading shown in Fig. 50, the deflection, moment, or shear at any point in section A B is found by substituting values of  $C$ , and  $C$ , as given by eqs. (11) and (12). For corresponding values in the unloaded portion B C, the values of the constants are given by  $C: i$  and  $C$ , of eqs. (13)...
