## Efficient stream analysis and its application to big data processing

By Rivetti di Val Cervo, Nicolo

Condition: New. Publisher/Verlag: Éditions universitaires européennes | In 1968, 140 IT companies were solicited to build the ARPANET network. Most of them regarded the project as outlandish and only 12 bid, while today there are 3.4 billions Internet users. The advent of Internet in the 90s, the commercial outbreak of cloud computing in the 2000s and the growing use of connected mobile devices since 2009 pushed the telecommunication and IT world into a new stage of interconnectivity. Researchers and practitioners understood that the massive amount of available data entailed new opportunities as well as challenges. In particular, common data management techniques were not tailored to match these features and, soon enough, the term Big Data emerged to capture all of these characteristics. The aim of this book is to design novel algorithms in the data streaming model, or extend current solutions, to solve practical issues in Big Data applications. | Format: Paperback | Language/Sprache: fre | 152 pp.

### Reviews

*This publication is definitely not effortless to get started on studying but extremely enjoyable to see. I was able to comprehend almost everything using this created e pdf. I am pleased to let you know that here is the finest publication i have go through in my very own lifestyle and could be he very best pdf for ever.*

-- Prof. Juliana Langosh DVM

*It in a of the best publication. It really is loaded with knowledge and wisdom You may like the way the blogger write this ebook.*
