Let the pupils lay the cone on the paper or card-board, placing a dot, marked 1, where the vertex touches the paper; another where the circumference of the base touches it, marked 2; and still another on the circumference where it touches the paper. Now roll the cone once around, so as to make the point marked on the base touch the paper again at 3, which point must also be marked on the paper. Join the points 2 and 3 to 1 with straight lines; and with 1 as a centre, and a radius equal to 1-2, join 2, 3 with an arc. When the base has been marked out, tangent to the arc, the result will be as follows: Cut out the form neatly, roll up the curved surface, and paste the edges and the base, as before shown.
