Springer. Paperback. Book Condition: New. Paperback. 598 pages. Dimensions: 10.0in. x 7.0in. x 1.4in. The Advanced Study Institute on Field Theoretical Methods in Particle Physics was held at the Universität Kaiserslautern in Kaiserslautern, Germany, from August 13 to August 24, 1979. Twenty invited lectures and seminar-speakers and 100 other participants attended this Institute. The contributions of most of the lecturers and seminar-speakers are contained in this volume. The revival of field theory in elementary particle physics that started about ten years ago has influenced all branches of elementary particle physics from fundamental research to pure phenomenology. The selection of field theoretical methods in particle physics appropriate for the Institute is therefore the first task for the organizers. We decided to have constructive problems of gauge field theories and solvable models as two major areas to be covered during the Institute. If one considers the concepts and terminology currently used by pure field theorists, one notices that many of them were introduced and discussed first by phenomenologists in comparing quite elementary models directly with experimental data. For this reason, it seemed worthwhile to reserve considerable time to phenomenological field theory. The Institute was sponsored by the North Atlantic Treaty...

Reviews

Very good electronic book and useful one. it absolutely was written extremely completely and useful. You will not feel monotony at any moment of your respective time (that's what catalogs are for relating to when you question me).

-- Prof. Noah Zemplak DDS

A top quality publication and also the font employed was interesting to learn. It is really simplistic but excitement within the fifty percent from the book. Its been designed in an remarkably basic way in fact it is only following i finished reading this pdf where in fact changed me, modify the way i believe.
