

Soft Fibrillar Materials

Filesize: 8.45 MB

Reviews

A brand new e-book with an all new perspective. It typically fails to cost an excessive amount of. I am effortlessly can get a satisfaction of reading a composed book.

SOFT FIBRILLAR MATERIALS

[DOWNLOAD](#)

Condition: New. Publisher/Verlag: Wiley-VCH | Fabrication and Applications | As one of the most important classes of soft materials, supramolecular materials are of a mixture of networks of molecular chains/fibrils and a liquid. These self-assembled fibrous/ molecular architectures exhibit various functionalities, ie. superhydrophobicity or superior mechanical strength, etc. and consist of the controllable structures. | As one of the most important classes of soft materials, supramolecular materials are of a mixture of networks of molecular chains/fibrils and a liquid. These self-assembled fibrous/molecular architectures exhibit various functionalities, ie. superhydrophobicity or superior mechanical strength, etc. and consist of the controllable structures. They can be functioned via micro/nano engineering, to have some particular added functions, ie. emission materials, tissue engineering scaffolds, bio imaging and sensing materials etc. They have therefore found broad applications in photography, cosmetics, food and petroleum industries and not the least in the biomedical sector where there is strong interest in these materials as drug delivery agents. The book covers the most important soft functional materials, including small molecule physical gels, silkworm silk and spider silk fibers and functional fibers, with respect both to the fundamentals and to development and engineering methods. It provides the reader with the necessary knowledge on the chemical and physical formation mechanisms of these materials and demonstrates that one can rationally design and tune the fibrillar networks so that the resulting materials exhibit the desired functionalities. This work is a must-have for all Materials Scientists, Polymer Chemists, Condensed Matter Physicists, and Biotechnologists working in this interdisciplinary field. | SECTION I: Small Molecule Gels MOLECULAR GELS AND THEIR FIBRILLAR NETWORKS Introduction Advances and Perspectives for Design of Gelators Stimulation of Gelation by Perturbations Other Than Temperature Kinetic Models for Following One-Dimensional Growth and Gelation Advances and Perspectives for a Priori Design of Gelators Some Final Thoughts ENGINEERING OF SMALL-MOLECULE GELS BASED ON THE THERMODYNAMICS AND KINETICS OF...
