

## Pandora's Box: Feminism Confronts Reproductive Technology (Paperback)

By Nancy Lublin

ROWMAN LITTLEFIELD, United States, 1998. Paperback. Condition: New. New. Language: English . Brand New Book. With the rigor of a dedicated scholar and the passion of a committed activist, Nancy Lublin offers a fresh perspective on the ethical dimensions of providing and using reproductive technologies, including contraception, assisted conception, and antenatal and childbirth interventions. Combining feminist philosophy and legal theory, Lublin considers these issues under a single category that she calls technological intervention in the womb. She addresses the positions of technophiles (who advocate acceptance of technological intervention in the womb as a source of liberation), technophobic feminists (who reject artificial invasions as anti-natural and anti-women), and other feminists who have argued that technological intervention in the womb should be legal and available to women because freedom of choice should be gender-neutral. Lublin identifies core principles that are common to a kaleidoscope of feminist theories, and she argues that a materialist feminism provides the most effective framework for establishing public policy and creating social change in the name of gender justice.
