

Dashboard for Consumer Generated Media

By Christian Hackel

GRIN Verlag. Paperback. Condition: New. 60 pages. Dimensions: 8.3in. x 5.8in. x 0.1in. Seminar paper from the year 2009 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 2, 0, University of Cologne, course: Marketing Seminar - Word-of-Mouth, language: English, abstract: In times of web 2.0 consumer generated content tends to have an even stronger influence on potential customers than marketing activities from the business side. The electronic world vastly accelerated the proliferation of information. Especially younger people often collect independent information about a product online, before actually purchasing it. Classic advertisement is predominantly considered to be biased. Due to this potential of autonomous information, it is crucial for companies to find effective ways to track, measure and interpret electronic Word-of-Mouth (e-WOM). This paper presents ways to measure web based contents quantitatively and introduces appropriate indicators to provide the company with a full-spectrum-view of the consumer generated media. Moreover the interrelation between e-WOM and sales is shown. As a conclusion, suitable metrics are adapted to a practically usable dashboard for the management. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.

Reviews

This book is definitely worth getting. It usually will not price too much. Its been printed in an extremely simple way in fact it is only right after i finished reading this publication where basically altered me, modify the way i think.

-- Avery Daugherty

Unquestionably, this is the greatest job by any author. It really is simplistic but shocks inside the fifty percent in the book. I am just pleased to inform you that here is the greatest book i actually have go through within my own existence and could be he greatest ebook for at any time.

-- Elva Kemmer
