

The NASA Scientific Data Purchase: Summary and Evaluation

Filesize: 7.8 MB

Reviews

It is fantastic and great. It is written in easy words and phrases instead of confusing. I am just delighted to explain how this is actually the best book I have ever read through during my individual life and might be the finest publication for ever.
(Prof. Murl Shanahan DDS)

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 136 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This report summarizes the results of the NASA Scientific Data Purchase (SDP) program implemented by the Stennis Space Center Earth Science Application Directorate in fiscal years 1998-2002. The SDP was conducted in support of NASAs Mission to Planet Earth (MTPE) program (currently known as NASAs Earth Science Enterprise). This Earth Science Enterprise (ESE) provides major observational capabilities for NASAs Earth system science research and the U. S. Global Change Research Program. Observations supported through the SDP were selected based upon their application to the five science themes of the MTPEESE: 1) Land cover and land use change research; 2) Seasonal to interannual climate variability and prediction; 3) Natural hazards research and applications; 4) Long-term climate: Natural variability and change research; 5) Atmospheric ozone research. The MTPEESE science themes, although they have evolved over time, are driven by a set of key science questions that help focus the research program on characterizing the Earth system. This item ships from La Vergne, TN. Paperback.
