

## Driven to Extinction: The Impact of Climate Change on Biodiversity

By Richard Pearson

The Natural History Museum. Hardback. Book Condition: new. BRAND NEW, Driven to Extinction: The Impact of Climate Change on Biodiversity, Richard Pearson, Could more than a million species disappear in the 21st century? Drawing upon a wide range of illuminating case studies from around the world, Driven to Extinction provides a balanced and highly readable insight into the potential impacts of climate change on the diversity of life. Richard Pearson meticulously assembles the evidence of how species of plants and animals have reacted to temperature changes in the past, and how they are likely to respond in the future. He shows how different species are interconnected, how subtle yet essential those connections can be, and how severing one link in the complex chain of mutual cooperation and dependency can lead to the breakdown of a once-thriving community and, ultimately, extinction. At the same time, he also explores how climate change can offer some species new opportunities even as it narrows prospects for others, highlighting the adaptability and survival techniques of some of the weirdest and most wonderful creatures on the planet. Exposing successes and flaws in current research, Driven to Extinction is an engaging and unbiased overview of what scientists...

### Reviews

*Thorough manual! Its this kind of excellent study. It really is written in straightforward terms and never difficult to understand. I am very happy to inform you that this is basically the very best pdf we have read through during my individual existence and could be the greatest ebook for possibly.*

-- Dr. Arno Sauer Sr.

*Completely essential go through book. I actually have to go through and I am sure that I am going to go through to read yet again yet again later on. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- Edwardo Rohan III
