Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Coast Guard Publication 7-0 Capability Management May 2013 Publication 7-0 serves as an authoritative statement for conducting capability management activities in the U.S. Coast Guard. It is intended to serve as organizational doctrine, and as such is not in itself directive in nature. Doctrine requires judgment in its application. Organizational-level doctrine in Publication 7-0 provides underlying principles for the development of more specific operational-level doctrine and TTP to manage cutters, boats, aircraft, facilities, C4ISR, personnel and special resources used for mission execution and mission support. This doctrine identifies four disciplines that together form the Capability Analysis and Management Framework (Figure 1), and which form Chapters 2-5 of this document: Chapter 1: Capability Management Doctrine - Description of capability management within the Coast Guard, stakeholder relationships and consideration of risk and readiness assessments in capability decision-making. Chapter 2: Requirements and Capability Analysis - Analysis and assessment of how well capability is satisfying requirements based on strategic objectives and identifying capability gaps. Chapter 3: Requirements Generation and Management - Maintaining traceability of validated requirements within a requirements inventory through all derived requirements and to an organizationally recognized source. - Chapter 4: Capability Sustainment - Monitoring capability to ensure it meets design requirements, both now and in the future.
